Event in a box

The counter

Full set up of your event in a box

Please take a moment to watch the set up instruction videos that can be found here:

<https://event-in-a-box.virtualhub.events/>

Or here:

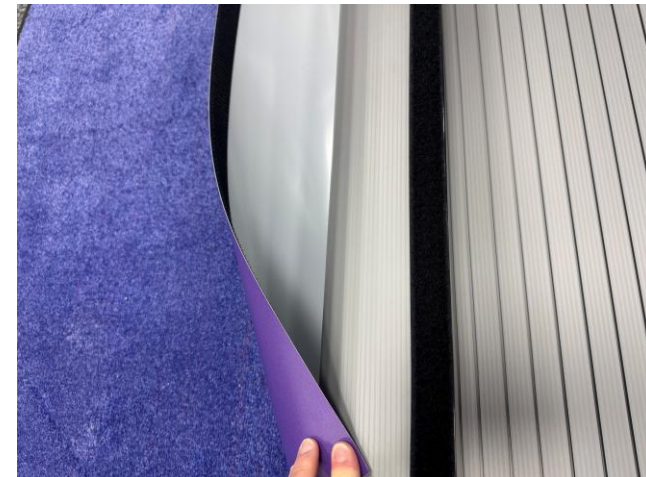

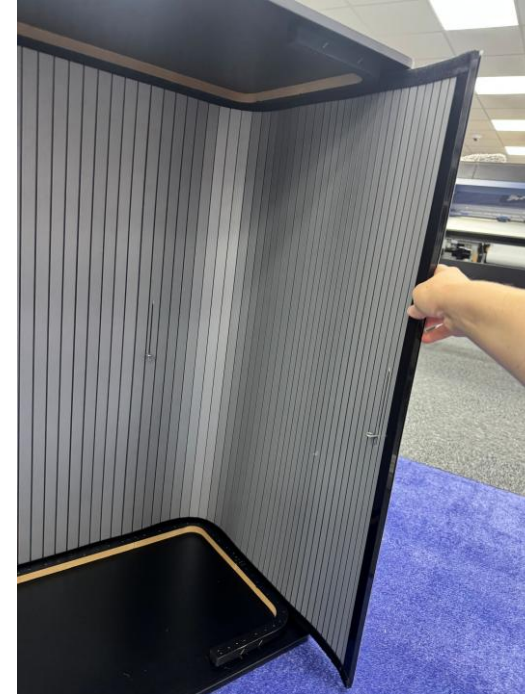

Assembly – The main section

Step 1 - Take the top and bottom of the counter out of the bag.

Step 2 – Attach the grey inner panel to the bottom board

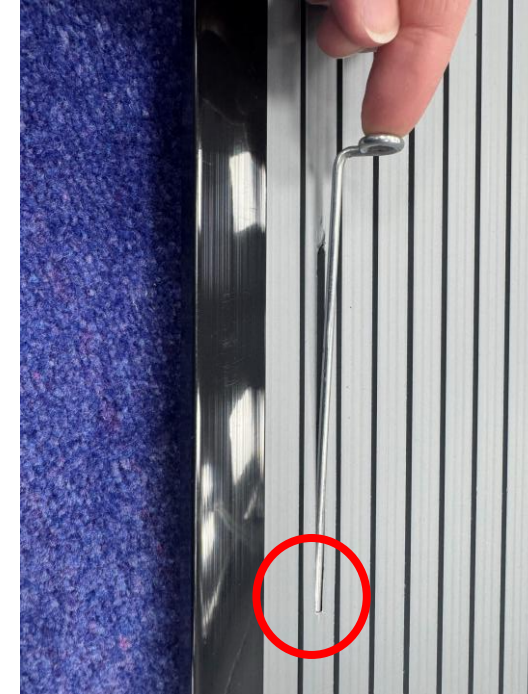

Step 3 – Pop the top on (TIP: it's a little easier to peel back the grey panel to align it with the top board)

Step 4 – Curl the graphic panel around the grey panel (TIP: this can be done before the grey panel is put in place)

Assembly – The shelf

Step 5 – Push the shelf supports into the slots (TIP: make sure these are the same height when pushed in)

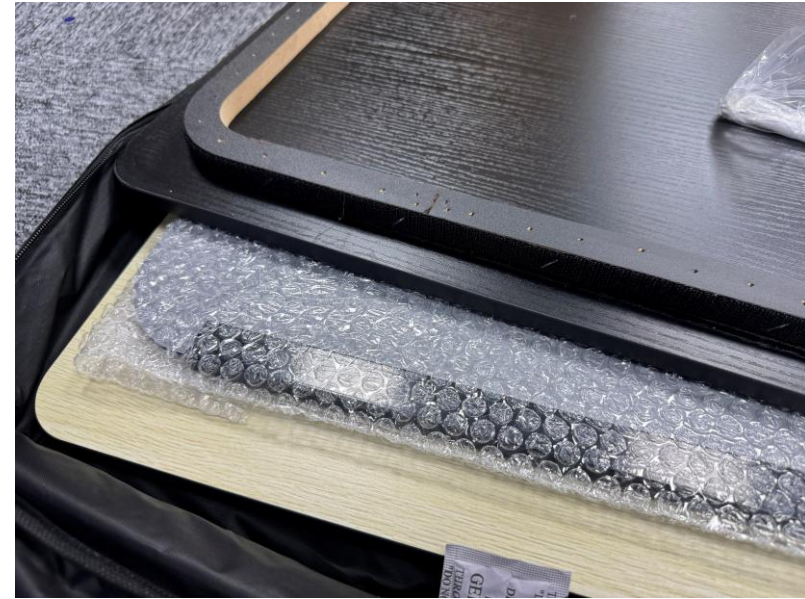

Step 6 – Add the support struts and place the shelf on top. Remember to keep the bubble wrap to protect and for carriage.

Packing away

Step 7 – Transport the shelf between the counter top and bottom in the bubble wrap

Step 7 – Packing away the Counter grey panel and graphic. Curl the graphic around the outside of the tube and the prep front panel in the center.
